

WLBC ENV. EDUCATION LESSON PLAN: EARLY YEARS & KEY STAGE 1; MATHS

Resources

Rulers
Measuring tape
Pencils
Paper
Writing boards

Linear maps; walk in a straight line with a group of children and get them to count their steps. Mark down how many steps it takes to find an object on their travels. This helps to create a basic map and record of their journey to utilise further in the classroom.

Measuring using body parts; using cubits and spans get the children counting in units of 10, measuring different objects around the park eg. tree circumference, height of a plant.

Now using measuring tools, eg. rulers and measuring tape get the children to compare the best methods for measuring each object.

Graphs; set up a basic graph using sticks for the X and Y axis. Sort leaves, flowers, etc. into order of size on the graph.
