

CLASSIFICATION: ANIMAL KINGDOM

Sorting animals with backbones which belong to the Phylum: Chordata (vertebrates) into their correct class. Draw lines from the animals to their correct class.

Class:

Mammals

- Warm blooded
- Have fur/ hair
- Feed young milk

Birds

- Have feathers
- Warm blooded
- Lay hard shelled eggs

Amphibians

- Cold blooded
- Live on both land and in water
- Lay soft eggs

Fish

- Cold blooded
- Wet scaly skin
- Breath using gills
- Lay soft eggs in water

Reptiles

- Cold blooded
- Dry scaly skin
- Lay soft eggs on land

CLASSIFICATION: ANIMAL KINGDOM

The scientific word used to better describe 'cold blooded', meaning the animals temperature will be the same as it's external surroundings is? Circle the correct answer.

Endothermic

Ectothermic

Name an animal that belongs to the vertebrates.

Name an animal which belongs to the invertebrates.

Draw lines from the animals below to their correct group- vertebrates or invertebrates.

Invertebrates

Vertebrates

Many invertebrates are our natural recyclers. They are detritivores, what do they eat?.

CLASSIFICATION: ANIMAL KINGDOM

The scientific word used to better describe 'cold blooded', meaning the animals temperature will be the same as it's external surroundings is? Circle the correct answer.

Endothermic

Ectothermic

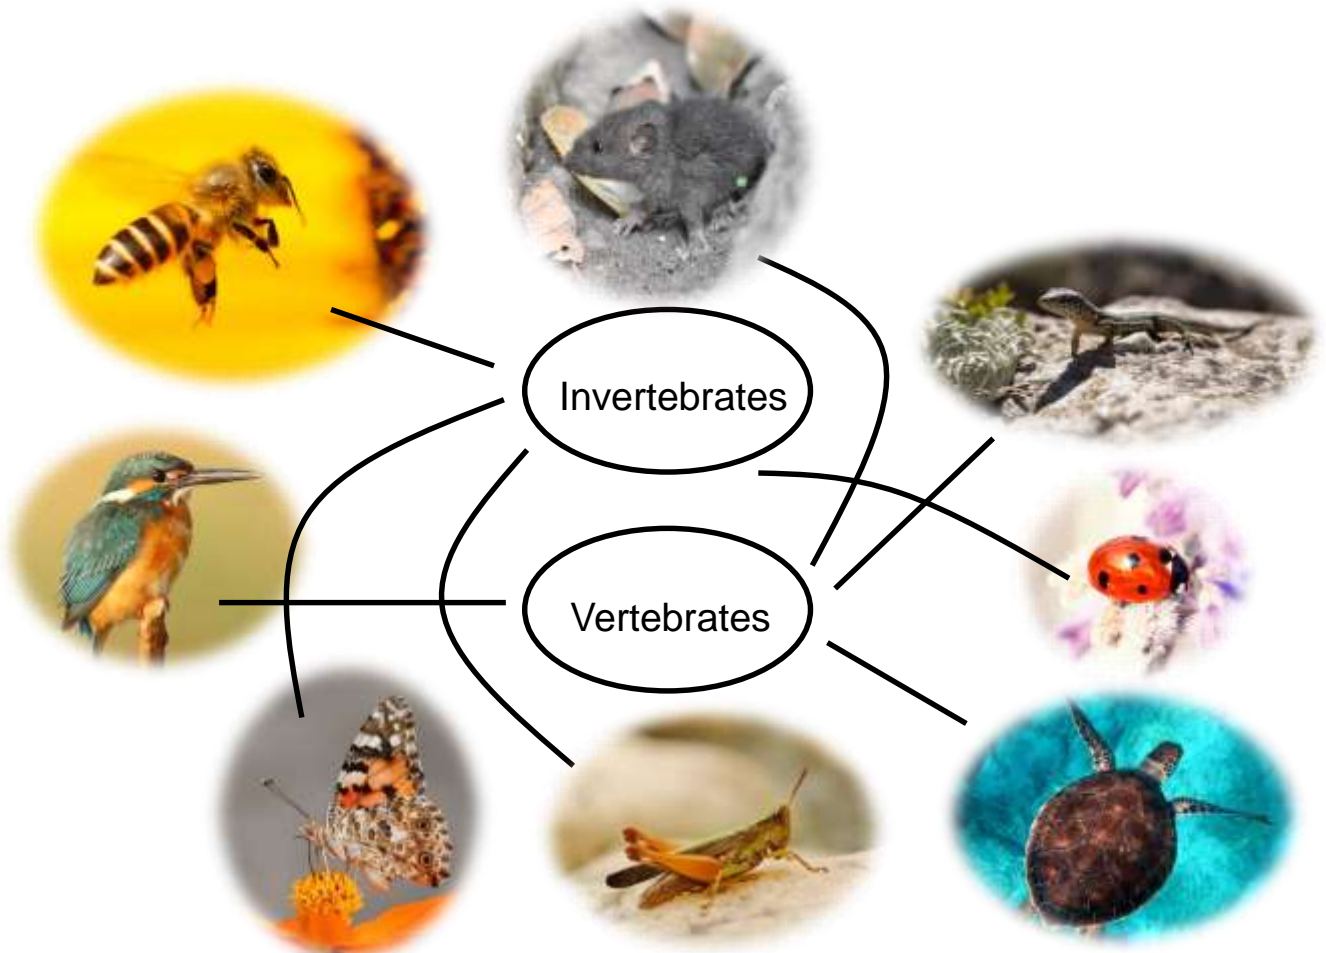

Name an animal that belongs to the vertebrates.

Human, fish, bird, reptile, amphibian

Name an animal which belongs to the invertebrates.

Ant, ladybird, worm, centipede, woodlouse, fly etc.

Draw lines from the animals below to their correct group- vertebrates or invertebrates.

Many invertebrates are our natural recyclers. They are detritivores, what do they eat?.

Eat detritus- leaf litter and dead plants
